

Necessity Entrepreneurs: Experiments To-Do

2026-02-20

Slides-Paper Table Alignment

Slides item	Paper section	Paper table label
Counterfactual 1: No Unemployment Risk	Quantitative Analysis / No Unemployment	<code>tab:cf1_no_unemployment</code>
Counterfactual 2: UI Level Changes	Quantitative Analysis / Unemployment Insurance	<code>tab:cf2_ui_levels</code>
Counterfactual 3: Consumption Floor (UI=0.4)	Quantitative Analysis / Consumption floor	<code>tab:cf3_consumption_floor_ui04</code>
Slides “Next Steps”: Credit Friction	Quantitative Analysis / Credit friction wedge	placeholder section
Slides “Next Steps”: Job Market	Quantitative Analysis / Job market experiment	placeholder section

Table Fill Status

Table	Status	Action
<code>tab:cf1_no_unemployment</code>	Complete	Keep as benchmark table
<code>tab:cf2_ui_levels</code>	Complete	Add revenue-neutral variant if available
<code>tab:cf3_consumption_floor_ui04</code>	Complete	Keep as slide Counterfactual 3
<code>tab:cf_consumption_floor_ui00_pending</code>	Pending	Fill UI=0.0 baseline/lump-sum/penalty values
<code>tab:cf_consumption_floor_ui00_lowmatch_pending</code>	Pending	Fill low matching-efficiency values
<code>tab:cf_consumption_floor_ui06</code>	Complete	Keep as high-UI robustness
<code>tab:cf_consumption_floor_no_unemp_no_tax</code>	Complete	Keep as near-invariance check

Immediate To-Do

1. Fill the two pending consumption-floor tables and add one interpretation sentence below each.

2. Decide whether UI analysis in paper remains *constant-tax only* or includes a separate *revenue-neutral* table.
3. Add one summary table collecting three outcomes across completed experiments: **entrepreneur-avg**, **firm size-avg**, **Unemp-Ent**.
4. Keep row order identical across all experiment tables for scanning consistency.

Baseline Interpretation (for paper and slides)

- Necessity share in baseline: $0.00204/0.145 = 1.41\%$.
- Education scale gradient: high-education firm size is $33.417/9.682 = 3.45\times$ low-education.
- No-unemployment counterfactual: entrepreneurship rises by 35.9% and average firm size rises by 10.3% relative to baseline.

What To Send Coauthors Next

- Updated draft PDF with standardized table labels.
- This checklist PDF.
- A one-page convergence request memo (separate PDF) asking for run logs/code for low-UI non-convergence.
